LINK SYSTEMS

Presents a Seminar on
**The What, Why and How of OSHA Requirements
for Mechanical Power Presses and Press Brakes**

An in-depth seminar on OSHA requirements for power presses and press brakes. Explains the rationale behind the standards and state of the art methods of achieving compliance. Advantages and disadvantages of various compliance methods are discussed relative to initial cost, effects on productivity, and safety. Demonstrations and illustrations accompany explanations and a text is provided for the student.

Safety Pays

Plan to attend this informative seminar.

**No OSHA Compliance?
No Safety Program?
No Productivity?**

**Know OSHA
Know Safety
Know Productivity**

... Know LINK
